

Dear decision maker:

I support a single-payer system, like the one proposed in SB 840, as the best solution to fix California's broken healthcare system. It will reduce healthcare costs and it's affordable for consumers, businesses and taxpayers. It will provide healthcare for everyone, yet still allow consumers to continue choosing our own doctors.

It's OUR healthcare
... so it should be *our* choice!

We need secure, affordable health care for everyone.

California School Employees Association

If we don't speak up for what we *want*, we might not like what we *get*.

As state lawmakers focus on healthcare reform this year, it is critically important that we speak up about what we want—after all, it's our health care! Unless we stand up for the kind of healthcare system we want, we might not like what we get.

We need reforms that help consumers, not the insurance & drug companies.

CSEA supports a single-payer health care system, like the one proposed in Senate Bill 840, as the best solution to fix our broken system. SB 840 will save us money and provide comprehensive healthcare benefits for all Californians, including part-time employees. Best of all, SB 840 would allow us to continue choosing our own doctors and hospitals.

Add your voice to the growing mandate for healthcare reform.

Use these postcards to tell your legislators and others that you support SB 840 as the best solution to fix health care. Point out that we are counting on them to focus on reducing healthcare costs and providing access to quality health care for all.

Together, we can be a powerful voice for change.
